Binocular Bresser CORVETTE 8x42 is a combination of modern, ergonomic shape, waterproof construction and great optics. Binoculars prism with BaK-4 optical glass prisms with high optical efficiency and excellent anti-reflective layers on all optical surfaces (FMC) provide great contrast and visibility even in difficult lighting conditions. The binoculars are equipped with retractable eyecups that cut the side light and impose an optimal distance of observation for people watching without glasses. People using binoculars with eyeglasses will appreciate the comfortably removed eye relief. Includes a neck strap, lenses covers and glasses, and a carrying case with a belt. Technical parameters: Lens diameter: 42mm; Zoom: 8x; Exit pupil: 5,25mm; Construction of prisms: dachpryzmatyczna; Material of glass elements: Optical glass Bak-4; Waterproof: yes, to a depth of 1 meter, up to 10 minutes; Anti-reflective layers: FMC, green; Possibility to connect a tripod: no; Weight: 663g Usage astronomy hunting planes nature scenery Basic applications; tourism; observation of nature; bird watching Warranty 2 years warranty Warning!
