The Golden Eye is probably the smallest monocular in the world. But it's not a toy! ATN has designed a complex optical system for a year to create this device. It consists of 27 parts, including 12 lens with a complicated shape, specially coated to offer you a crystal clear, 8-fold enlarged image. It is smaller than a small toe and weighs less than 30 grams, and at the same time gives a great picture. A real gem! Technical parameters

- â€¢ Zoom: 8x
- â€¢ Lens diameter: 15 mm
- â€¢ Optical system: 12 lenses and 3 prisms
- â€¢ Focus adjustment (Diopter): +/- 6
- â€¢ Dimensions: 46 mm x 25 mm x 25 mm
- â€¢ Weight: 20 g
