

teleskopy.pl

Celestron telescope 20-60x60 "straight" is a neat refractor for observing nature, birds, excellent for target shooting (observation of the target at distances of 25, 50 and 100 meters, eyepiece set in the telescope axis (roof prisms). High optical quality. Supplied with a soft case, an aluminum case and a metal table stand (to be placed on a window sill, car hood or table). Can be placed on any photo tripod with a standard screw fixing 1/4 inch. Technical parameters

- Zoom: smoothly variable, 20-60 times
- Lens diameter: 60 mm
- Optical system: achromatic refractor
- Focal length of the lens: 340 mm
- Anti-reflective layers: FC
- Field of view: 2.7° - 0.9° (45 - 15 m / 1000 m)
- Minimum distance of observation: 8 m
- Retracting the output pupil: 18 mm
- Length of the tube: 34.5 cm
- Weight: 650 g
