Laser rangefinder Leica Disto D5 Rangefinder Leica DISTO – an innovative, hand-held laser rangefinder that allows you to quickly and easily measure length, field and volume at the touch of a button. Range finder for professional applications . Characteristics – Measuring range: 0.05m - 200m, accuracy ± 1.0mm - precise, fast and reliable measurements – Digital viewfinder with 4x zoom and high resolution display - convenient measurements for remote objects, even on very sunny days – Power Range technology - measuring distances up to 100 m without target sight, up to 200 m with shield – Tilt sensor - measurement of vertical angles up to ± 45 ° at the push of a button – Measuring horizontal distances using tilt sensor - measuring distances despite obstacles in the field is not a problem – Trapezoidal functions - easy and quick measurements of roof slopes and façade surfaces – Pythagorean functions - indirect measurement of height and width in inaccessible places – Displaying detailed data - additional information about the measurement is available at the touch of a button, for example information about Technical parameters – Effective range: 0.05 m (5 cm) - 200 m – Accuracy: +/- 1 millimeter – Min / max measurement: YES – Continuous

measurement mode: YES â€¢ Addition and subtraction of measurements: YES â€¢ Area and volume measurements: YES â€¢ Slope measurements: YES, +/- 0.3 ° â€¢ Indirect measurements using the Pythagoras function: YES â€¢ Memory of last measurements: YES, 20 â€¢ Auto timer: YES â€¢ Backlight of the screen: YES â€¢ Immunity class: IP 54, dustproof, splash-proof â€¢ Power supply: 2 x AAA battery ("small finger"), up to 5000 measurements on one set of batteries â€¢ Tripod mount: 1/4 inch (standard tripod thread) â€¢ Dimensions [mm]: 143.5 x 55 x 30 â€¢ Weight [g]: 195 (with batteries) Equipment included â€¢ carrying case â€¢ wrist strap â€¢ 2 AA batteries â€¢ operating / safety instructions manufacturer's certificate of conformity with DIN 55350-18-4.2.2 â€¢ Quickstart guide Warranty 2 years
