Celestron 70 Travel Scope is a telescope for beginner sky viewers, great for children. Easy to carry, equipped with a height adjustable aluminum tripod and a transport backpack to which the entire set is placed. In addition to astronomical applications, it can also be used as a viewing telescope (it gives the picture a terrestrial, uninverted image). The set can be extended with glasses for higher magnifications. You will see very clearly, among others, the Travel Scope 70 telescope impact craters on the moon, the phases of Venus and Mercury, the four moons of Jupiter and the ring of Saturn, the Andromeda galaxy and the Orion nebula, numerous clusters, galaxies and nebulae. During the day, the telescope can become a companion for walking in the forest and observing nature, birds and distant terrain formations. Celestron is an American optics manufacturer that for several decades has been providing the best quality instruments for both beginner observers and advanced amateurs or university observatories. The Celestron brand is a guarantee of the best quality at a given price. Technical parameters

- Optical system: refractor (achromatic doublet)
- Lens diameter: 70 mm
- Focal length of the lens: 400 mm
- Lighted: 1 / 5.7
- Switching capacity: 1,5'
- Theoretical range: 11mag
- Maximum useful magnification: 140x
- Weight: 1.5 kg

Usage Moon the planet star clusters nebulae scenery Equipment The set includes the following accessories:

- 1.25" focuser
- 20 mm (20x) and 10 mm (40x) glasses - 1.25" standard, 50 ° field of view
- Optical sighting scope 5x24
- Aluminum photo tripod (azimuth mount, 126 cm maximum height, composite length: 42 cm)
- 45 ° angle attachment
- Educational CD "Sky Level 1" (in English)

Warranty 2 years (Celestron Travel Scope 70 telescope on a height adjustable photographic stand) (70 mm lens allows you to see many subtle details of the Moon and planets, and also provides good brightness for the first observations of the Deep Universe) (1.25" extractor allows the use of glasses, connectors and filters in this standard) (the telescope is equipped with a 45 ° angular connector, turning the telescope into a telescope with a terrestrial image) (included in 2 glasses, 20x and 40x magnification, this set can be extended) (swivel assembly head in all directions) (a backpack for storage and convenient transport included) (all components are included in the backpack) (set of accessories included in the set)

Warning! This device focuses a lot of light. Looking directly at the sun through this device can result in partial or complete loss of vision. For the observation of the Sun, we recommend the safest method of spectacle projection, that is, projecting the image of the target of our day star on a piece of paper.
