Camrock TH-70 is a universal high tripod with a comfortable 3D head. The head is interchangeable, and on a tripod, you can mount any head with a standard 3/8 inch thread. The aluminum multiplier with very good durability has legs with a special cross-section guaranteeing increased stability and durability. The tripod also has a hook for hanging the load and feet with joints significantly improving stability. The head is equipped with a double level and a retractable column with a crank. This tripod is great for use with SLR cameras, heavier digital cameras and cameras, small and medium telescopes and binoculars. Characteristics

- high quality of reinforced aluminum
- comfortable 3D head with a spirit level (the ability to disconnect, change the head)
- high stability and durability
- convenient carry handle
- self-leveling feet
- extendable column with a crank
- three-legged legs
- hook for hanging the load
- fast and easy operation
- a cover with a belt included.
