

teleskopy.pl

Excellent, transmission microscope. It allows you to obtain magnifications from 40 to 1000 times. The extensive equipment makes it an indispensable device both in laboratories, schools and for micro-world lovers. Adjustment of lighting intensity and integrated lens condenser with iris diaphragm allow selection of optimal microscopic conditions for each preparation. The cross table included with the micro- and macro-adjustment system allows the exact positioning of the preparation, searching for interesting fragments and precise focusing. The battery built into the base of the microscope allows you to use without power after charging the microscope from the mains. Technical data: \varnothing Zoom: 40x - 1000x \varnothing Okular: 10x (WF) \varnothing Diameter of glasses: 23 mm \varnothing Achromatic lenses: 4x / 10x / 40x / 100x (oil), DIN \varnothing Lighting: LED (LED) Equipment (included): \varnothing monocular head \varnothing 2D cross table \varnothing illuminator illumination \varnothing sm regulation of light intensity \varnothing integrated condenser lens \varnothing AC adapter (set: microscope, mains adapter, foil pouch, blue filter, immersive oil) (magnification from 40 to 1000x) (built-in rechargeable battery for use in the field) (wide eyepiece 10 mm WF / 23 mm) (four achromatic lenses in the turret: 4x, 10x, 40x, 100x oil) (cross table with millimeter pitch in the table plane) (Macro and micrometer focusing screw 1:10) (condenser and diaphragm with iris)
