Celestron PowerSeeker 50 AZ is designed to offer the aspiring astronomer a perfect combination of quality and price. Powerseeker telescopes, offering an exceptional price, mobility and extensive equipment are a very good introduction to the world of amateur astronomy. The telescope is mounted on an azimuth assembly of a versatile application suitable for both astronomical and terrestrial observations. The unique design and affordable price and the large observation possibilities are the hallmarks of this model. OFFERED TELESCOPIC LINKS TO START OBSERVATIONS IN THE FIRST WEATHER NIGHT, CONTAINS SUNGLASSES AND STATIC

Technical parameters

- Optical system: refractor (lens telescope)
- Diameter of the mirror: 50 mm
- Focal length of the lens: 600 mm
- lighted: 1/12
- Extract: 0.96 "/ 24.5 mm
- Image orientation: terrestrial, not inverted up-down
- Tripod height: 123.5 cm
- Length of the tube: 61 cm
- Weight: 2300 g with packaging

Equipment

The set includes the following accessories:

- eyepiece 1: 20 mm (30x magnification)
- eyepiece 2: 12 mm (magnification 50x)
- eyepiece 3: 4 mm (magnification: 150x)
- Barrel lens: 3x
- finder: 5x24
- angled cap: 0.96 "
- assembly: azimuthal
- tripod: aluminum
- software: "The SkyX" Planeta Software (in English)
- Warranty 2 years

Warning! This device focuses a lot of light. Looking directly at the sun through this device can result in partial or complete loss of vision. For the observation of the Sun, we recommend the safest method of spectacle projection, that is, projecting the image of the target of our day star on a piece of paper.
