

teleskopy.pl

The beautiful, small monocular Tamed 10x25 is designed for people who travel a lot, go to sports or cultural events and want to have a suitable optical device with them. At a weight of only 155 g, Tamed 10x25 meets these requirements. It fits in every pocket, in every bag. The telescope can also be used for bird watching and daytime hunters when larger equipment would not be suitable. Fully coated with anti-reflective layers, the optics ensure very good image quality.
