Tamed 600 6x25 is a precision laser rangefinder for field measurements, intended primarily for hunters. The measuring range up to 600 meters is a feature appreciated by hunters. He will also like golfers and everyone who needs distance measurement in the field. An additional, unique feature of the rangefinder is the presence of a solar panel to charge the internal battery. A fully charged device battery allows you to measure distances over 2,000 times! When the built-in battery is completely discharged, the Tamed Optics rangefinder uses an additional CR-2 battery. Technical parameters

- Effective range: 5 - 600 meters
- Accuracy: +/- 1 yard (about 0.91 m) / 1 meter
- Measurement time: from 2 seconds (normal conditions) to 15 seconds (rain, high air dustiness)
- Measurement modes: normal, rain (RAIN), obstacles at a distance of up to 150 meters from the user (> 150, ignored signal from objects closer than 150 meters), object with high reflectivity (REFL)
- Zoom: 6x
- Lens diameter: 25 mm
- Field of view: 7 degrees
- Power supply: 3V CR2 lithium battery (included) and internal rechargeable battery charged from the solar panel
- Dimensions: 110 mm x 70 mm x 35 mm
- Weight: 230 g (with battery)
- Warranty: 1 year
