TS Marine MX binoculars with 10x magnification are universal equipment for bird watching, wildlife, very good astronomical binoculars for suburban sky. We also recommend it to experienced hunters due to its high visibility in twilight conditions and the exit pupil equal to 5 mm - suitable for people who are 35-40 years old. Features of the MX Marine series of binoculars TS MX Marine binoculars are characterized by a very strong construction - a solid metal body is covered with rubber. These binoculars can withstand even significant impacts or a fall from a low height. They are not harmed by high humidity, rain or water. They are protected by O-rings and filled with nitrogen, which makes them good on the water (sailing, kayaking, motor-boating), as well as during natural observation. Miles of astronomy will appreciate the flat field of view (no distortion of the image), very good correction of chromatic aberration and high efficiency of the optical system. The TS MX Marine binoculars have a focusing system for each eye in combination with a large depth of field. Thanks to this, high mechanical resistance and comfort have been achieved - binoculars do not require frequent focusing on objects at different distances. Technical parameters

- Lens diameter: 50 mm
- Zoom: 10x
- Output: 5 mm
- Construction of prisms: porropryzmatyczna
- Material of glass elements: optical glass BaK-4
- Anti-reflective layers: MC on all optical surfaces, blue, total system efficiency 95%
- Field of view: 6.5 ° / 113 m / 1000 m
- Eye relief: 18.5 mm
- Relative brightness: 25
- Twilight efficiency: 22.4
- Adjusting the focus: individually for each eyepiece
- Minimum distance of observation: 10 m
- Range of eyepieces / output gauges: 56 mm - 74 mm
- Water resistance: YES
- Nitrogen filling: YES
- The option of connecting a tripod: YES
- Weight: 1600 g
