

Extender 2" / 2" - an extension that allows you to install an eyepiece or other accessories about 35 mm farther away than typically in the eyepiece extractor. The inner surface of the connector is matt blackened to minimize glare. The thread of the connector allows the use of two-inch filters. The applied clamping ring effectively protects the used accessories from scratches and damage, as well as ensures proper alignment of accessories to the axis of the connector. Using the 2" / 1.25" adapter, it can be used with accessories in the 1.25 inch standard. • weight: 102 g • the connector has a 2" filter thread
