

The 8x50 scanner holder made of metal, together with the mounting foot, dedicated to many brands of finders present on the market such as: GSO, Orion, Meade, Sky-Watcher. It is not compatible with Antares and Celestron seekers. Made of plastic, two collimation screws and a special screw with a spring allow easy positioning of the finder relative to the telescope. On the equipment there is a mounting foot of the finder found in the GSO, Orion, Sky-Watcher and Vixen telescopes. The internal clamping diameter is 53 mm.
