

# teleskopy.pl

A complete optical tube with a 150mm F / 5 mirror (6 inches, 750mm focal length), with a Crayford 2 " / 1.25" extraction and a good optical finder 6x30mm, designed for visual observations and astrophotography. It has a very bright parabolic mirror, relatively small size and weight of 5.9 kg with clamps, which makes this telescope a universal observation tool.

Characteristics

- â€¢ large glass mirror with diameter 150mm (6 inches)
- â€¢ brightness f / 5 great for both visual observations and astrophotography
- â€¢ efficiency of mirrored surfaces 94% of the main
- â€¢ 2-inch draw with reduction to 1.25 inches
- â€¢ Optical finder 6x30 fixing to the tube
- â€¢ 2 " / 2" eyepiece adapter 35mm with clamping ring
- â€¢ tube clips and mounting rail dovetail width 43mm

Technical data

- â€¢ Optical system: Newton reflector
- â€¢ Diameter of the lens: 150mm
- â€¢ Focal length: 750mm
- â€¢ light: f / 5
- â€¢ Dimensions of the secondary mirror: 63mm (length of the shorter axis)
- â€¢ Stellar range: 13 magnitudes
- â€¢ Maximum useful magnification: 300x
- â€¢ Dimensions: 176mm x 176mm x 690mm (length less than 70cm!)
- â€¢ Weight: 5.9kg (including flt, finder, clamps)

Usage Moon the planet star clusters nebulae astrophotography

---

Warranty 2 years (complete optical tube in the Newton 150 F / 5 system) (Crayford focuser) (thin "paj ? k", i.e. fixing the secondary mirror, collimation mark on the main mirror) (binding of the main mirror) (finder 6x30) (eyepiece with 1.25 "eyepiece) (with a 2-inch eyepiece)
