Super Wide Angle Meade series 5000 glasses are a very good choice for demanding customers. They are characterized by a 68-degree wide field of view and very good image and contrast quality. They consist of 6-7 optical elements and provide an almost flat field of view. They work particularly well with Schmidt-Cassegrain, Newton and Schmidt-Newton type telescopes. Technical parameters " Focal length - 40mm " Housing diameter - 2 " " Field of view - 68 ° Warranty 2 years warranty
