

teleskopy.pl

The connector allows you to attach HD Hero cameras (all versions) to the steering wheel, saddle post, ski poles and everywhere, where you will be prompted by imagination - for example, a screw, a pole on a windsurfing board. Suitable for any elements with a circular cross-section of diameter in the range of 1.9 - 3.5 cm (0.75 - 1.4 inch). Included with the 3 D swivel arm, allowing any orientation of the camera - it will film what you want and the way you want. Material: polycarbonate Warranty 24 months Additional product photos Manufacturer's materials
