The offer has been extended with two models with the parameters 8 x 42 and 10 x 42. The devices are characterized by the highest quality optics and stylish, classic design. The Nikon PROSTAFF 7 binoculars are designed for both nature lovers and active leisure. The Nikon PROSTAFF 7 Series binoculars provide the perfect image in almost all conditions. The new models use an advanced optical system made of ecological glass, which does not contain lead and arsenic. Thanks to the prisms in the roof system, with the coating correcting the phase shift, the binoculars offer high resolution and excellent detail visibility. In addition, the prisms and all lenses have been covered with efficient, multilayer anti-reflective coatings. This solution guarantees a very clear and clear picture, even during observations conducted in difficult conditions, eg in the forest or after dark. To ensure the convenience of users, the binoculars are equipped with eyecups with adjustable retraction with a lock, allowing them to be easily positioned in a position appropriate to the individual preferences of the observer. Thanks to the large offset of the exit pupil, the new models can also be easily used by people wearing glasses. Nikon PROSTAFF 7 binoculars are distinguished by stylish, classic design. The light weight and the right balance of weight means that the new models are firmly in the palm of your hand, and the rubberized body of the body provides a comfortable and secure grip. This solution also protects the device against mechanical damage. Filling the binoculars with nitrogen and sealing rings effectively protect the interior
