

teleskopy.pl

Celestron Nexstar 127 SLT is a computerized telescope of the Maksutów - Cassegrain system equipped with a pilot-controlled assembly with a base of 4000 astronomical objects. Very easy to use and fast to assemble, and at the same time offering excellent optical performance. Equipped with innovative sky orientation technology SkyAlign. The SkyAlign control system in conjunction with the GT / GOTO system makes it very easy and instant to find four thousand objects of the starry sky. The 90 ° angled connector, included in the set, enables observation of ground objects. Telescope recommended especially for balcony observations and those who are looking for a telescope with GOTO with high mobility. Additional advantages

- focusing Focusing is performed not through the external sliding puller, but through the micrometer screw moving the main telescope mirror. This method of focusing the image provides a very wide range of sharpness adjustment, thanks to which virtually any astronomical accessories work well with the tube, and the clearances on the extractor simply do not exist.
- T2 thread in the eyepiece extractor The eyepiece extractor is equipped with a T2 thread (M42x0.75), so you only need a T2 ring for the bayonet of your camera to connect the SLR (Nikon, Canon EOS, Sony ?, Sony NEX, Micro 4/3, Olympus E, Olympus 4/3, Pentax K). In this way, we can use the telescope to take pictures of the Moon and planets or use it as a telephoto lens of 1500 mm f / 11.8.

OFFERED TELESCOPIC LANDS TO START OBSERVATIONS IN THE FIRST FALLING NIGHT - INCLUDES ALL NECESSARY ACCESSORIES

Usage Moon the planet star clusters nebulae PC control Technical parameters

- Optical system: Maksutow - Cassegrain
- Lens diameter: 127 mm
- Focal length of the lens: 1500 mm
- Lighted: 1 / 11.8
- Theoretical range: 13th magnitude
- Maximum useful magnification: 260x
- Weight: 8.1 kg

Equipment The set includes the following accessories:

- 1.25 "focuser
- Glasses in the 1.25 "standard: 25 mm (magnification 60x) and 9 mm (167x)
- StarPointer scopes (collimator)
- Azimuthal computerized GOTO assembly, controlled by a remote control, with a base of 4000 astronomical objects
- Tracking speed: 3 ° / sec, 2 ° / sec, 1 ° / sec, 64x, 32x, 16x, 8x, 4x, 2x, 1x
- Steel field tripod with accessories shelf
- 90 ° angle attachment
- Educational CD "Sky Level 1" (in English)

Warranty 2 years

READ : A SHORT OPTICAL CLEANER GUIDE  [PDF] READ TO: HOW TO CONNECT COMPACT WITH TELESCOPIC  [PDF] READ TO: HOW TO JOIN THE DIGITAL MALE WITH A TELESCOPIC  [PDF] Warning! This device focuses a lot of light. Looking directly at the sun through this device can result in partial or complete loss of vision. For the observation of the Sun, we recommend the safest method of spectacle projection, that is, projecting the image of the target of our day star on a piece of paper.
