

Suction cup for HD Hero cameras allows you to securely attach the camera to your car, boat, motorcycle (for example, windshield, spoiler, motorcycle tank, etc.). It can even be used to attach the camera to the plane plating (GoPro does not recommend using a suction cup for aircraft for safety reasons). Effective fixing was tested at speeds over 150 miles per

---

hour (over 240 km / h). The suction cup is not recommended for surfboards, snowboards, and is not recommended in contact sports. Adapter compatible with all HD Hero cameras (3+, 3, 2, Original). For maximum strength, the suction cup should be attached to clean, dry surfaces. The suction cup has a swivel arm for optimal camera positioning while filming. Additional product photos
