Very strong binoculars with a diameter of 70 mm and magnification 25 times, one of the binoculars' favorite binoculars on high altitudes, also recommended for distant field observations and useful in amateur astronomy. The lenses were coated with MC anti-reflective layers. 2.8 ° flat field of view, Porro BaK-4 prisms guarantee very good image quality. The binoculars in the set have a photo tripod adapter - due to the large magnification, we recommend observations after attaching the binoculars to the tripod. Comes with a neck strap, lenses and glasses covers, a belt case and a tripod adapter (1/4 "- standard tripod thread). Technical parameters
