Delta Optical Forest II 12x50 is a solid roof binoculars, excellent in far-sighted field observations "from the hand", for bird watchers and selectioners in hunting. Good coatings on all optics (MC on objectives and eyepieces, phase coverage on prisms) are a guarantee of the reproduction and clarity of images obtained. High resistance to weather conditions (O-rings and nitrogen filling) and resistance to mechanical damage (rubberizing) ensure the longevity of the binoculars. Includes a neck strap, lenses covers and glasses, and a carrying case with a belt
