

The Nikon 7x50 Marine IF WP Compass is a wonderful, fully waterproof binoculars with 7x magnification and 50mm diameter lenses with a backlit illuminated (LED) compass in the field of view of the binoculars. The IF symbol means an individual focus for each eye, which, in combination with a large depth of field, gives a high comfort of use, because the binoculars, when set to the user's visual impairment, do not require focusing at a distance of 25 meters to infinity. The lack of moving parts of the bridge provides increased mechanical resistance and higher water resistance. Nikon Marine Compass are specialized binoculars for captains, skippers, helmsmen, deck officers and all those who love observations from the deck. It provides a stable and bright image in all lighting conditions. Supplied with a cover, neck strap and lenses covers. Characteristics

- bright and stable image in all conditions
- nitrogen filling
- water resistance up to 2 meters to 5 minutes
- resistance to fog
- large offset of the pupil output - ideal also for people wearing glasses
- built-in illuminated compass in the field of view - visible azimuth in the range of 0 - 360 °

Technical parameters

- Lens diameter: 50 mm
- Zoom: 7x
- Exit pupil: 7.1 mm
- Retracting the output pupil: 18 mm
- Minimum distance of observation: 25 m
- Construction of prisms: porropryzmatyczna
- Material of defective elements: optical glass BaK-4
- Field of view: 7 °
- Linear field of view at 1000 m: 122 m
- Anti-reflective layers: MC
- Adjusting the spacing of eye: 59 - 72 mm
- Adjusting the focus: individual in each eyepiece
- Weight: 1210 g

Usage

- sailing
- fishing
- observation of nature
- bird watching
- travels
