

teleskopy.pl

A red dispersing cap (diffuser) for use in Fenix flashlights. Works well as a night light in conditions when we do not want to influence the adaptation of sight to the dark and as a warning light. The diffuser works with the following models of Fenix flashlights: TK10, TK11, TK12, TK15, TK20, TA20, TA21, RC10 Diameter: 34.5 mm total length: 12 cm
