The Yukon Patrol 4x50 is a night vision telescope with a significant 4x magnification and 50mm lens. Built-in LED IR (infrared) light allows observation even in very dark night and indoors. In conditions of the sad lighting (Moon, starlight) Patrol can work in passive mode, i.e. with the IR turned off. The night vision is compact, lightweight and resistant to external conditions. Technical parameters

- Generation: 1+
- IR illuminator: built-in, diode
- Zoom: 4x
- Diameter of the lens: 50 mm
- Resolution: 36 lines / mm
- Observation range: up to 300 m
- Field of view: 15 °
- Adjusting the sharpness to your eyesight: +/- 5 D
- Power supply: 3 V (2x AAA)
- Temperature range: from -25 to + 40 ° C
- Working time without changing the power source: up to 70 hours (without IR, 20 ° C, with IR on - 20 h)
- Tripod mount: YES, 1/4 inch
- Dimensions: 190 x 87 x 62 mm
- Weight: 400 g
- Warranty 3 years
