

Yukon Spartan NVMT 1x24 generation I is a small, lightweight night vision magnifier with 1x magnification, designed to conduct nocturnal observations "at hand". Range of observation: up to 200 meters in the conditions of the sad lighting. It has a built-in LED infrared illuminator for observation in total darkness. Technical parameters

- Generation: 1
- IR illuminator: built-in
- Zoom: 1x
- Resolution: 36 lines / mm
- Range: 70 m in total darkness, 200 m with a lighting fixture
- Field of view: thirty
- Diameter of the lens: 24 mm
- Power supply: 3-volt CR123 battery (included)
- Working time without changing the power source: 20 hours
- Dimensions: 142 mm x 82 mm x 60 mm
- Weight: <0.38 kg

Usage forestry hunting sailing nature fishing Warranty 3 years >> FREQUENTLY ASKED QUESTIONS << Question : What is the difference between the 1 and 2 generation night vision devices? I want to buy a night vision device, but I would like to learn more about night vision technology. Answer: Basic information can be found in the HOW TO OPERATE THE NECTOR (click to read) Question : What is the CR123 battery? Are there "batteries" of this type? Answer: CR123 batteries are 3-volt lithium batteries, often used in cameras, rangefinders, crosshairs, tactical flashlights. Lithium cells have a large capacity, they are resistant to temperatures from -55 to +70 degrees Celsius, and they have a very long life - up to 15 years of usability (at room temperature). Yes, there are available batteries on the market (RCR-123 symbol, they require a dedicated charger).
