

teleskopy.pl

Universal mounting plate with Vixen standard installed vertically to dovetail. The plate has, among others 1/4 inch and 3/8 inch holes. Includes two 1/4 inch attachments with counter-clamp. It allows mounting on the assembly with the Vixen / Sky-Watcher standard head any lens, binoculars up to 120 mm diameter and astronomical telescopes up to ? 150 mm, if they have a foot in 1/4 inch female thread or can be set clamps on the tube close to each other (in the position of the extreme holes of the plate). The adapters have been equipped with a counter-screw from the bottom so that the device can not be attached to the adapter depending on the depth of the tripod socket. Holes in the plate allow for mounting the dovetail rail in various places on the tile (see the pictures below) ∅ weight: 260 g ∅ dovetail standard: Vixen / Sky-Watcher ∅ length of dovetail (connector with assembly): 12 cm ∅ width of dovetail (connector with assembly): 43.8 mm ∅ dovetail height (connector with assembly): 20 mm ∅ plate dimensions: 19.5 x 12 cm ∅ plate thickness: 4.7 mm ∅ mountings: 1/4 inch and 3/8 inch (see photo below) ∅ the position of the 1/4 inch screw relative to dovetail can be

changed by turning the arm backwards (just unscrew 2 allen screws) â€¢ weight of dovetail rail: 155 g â€¢ weight of the mounting plate: 290 g â€¢ set weight: 540 g (click to see in large size)
