

teleskopy.pl

The Redleaf kit allows you to mount the webs on almost all objects. Flat glued supports allow mounting on flat surfaces. Supports glued rounded enable mounting on rounded surfaces. The screw clamping support enables exceptionally secure clamping on profile elements (pipes, strips, etc.). Thick and durable strap allows you to mount a webcam, for example on the head, shoulder, helmet. The strap allows for rapid assembly and disassembly. You can add articulated elements to each mounting so that the camera can be positioned in any direction, at any angle. The screw terminals guarantee rigid connections. The set also includes a quick connector allowing for quick attaching and detaching the camera from the supports. • 4 pieces of 3M glued supports in two types • 4 pieces of fastenings for sticking • 6 fixing screws (other sets have only 5 screws) • wide fastening strap, much stronger than belts with buckles • four joints, where two of them have parallel fasteners, and two of them perpendicular - provide more camera settings than wrists in other sets • producer: Redleaf • a set dedicated to: GoPro Hero / Hero2 / Hero3 / Hero3 +, HERO4 The set fits all GoPro cameras: Hero2 / Hero3 / 3+ / 4/5, Session cameras. Will work on a motorcycle, sailboat, quad, car, bike,

skateboard, helmet and many more.
