William Optics Dura-Bright 2 "model 2014 - a huge jump in the quality of mirrored mirrors 2 "dielectric angular attachment is a classic elegance combined with perfect performance, ideal especially for astronomical observations using wide-angle 2" spectacles. The nozzle is intended for refractors, mainly top construction, requiring uncompromising quality, such as WO FLT-98, FLT-110, GT / GTF102 or FLT-132. The lug does not include the SCT tube adapter. Technical parameters / features ∅ side body plates made entirely of carbon fibers ∅ dielectric coatings ensure optics efficiency of 99% ∅ 12 mm thick mirror has a surface precision of 1 / 12? ∅ interior with baffles (diaphragms) that eliminate glare ∅ output 2 "equipped with a copper mounting ring (guarantees the safety of accessories) ∅ 2 " / 1.25" adapter equipped with a copper fixing ring ∅ size: 2 "+" reduction 1.25" with the screw fixing the eyepiece ∅ large, knurled screws that are easy to tighten even when wearing gloves ∅ internal stop protects against eyestrain in the mirror ∅ 48 mm internal diameter allows the attachment of a wide range of filters and other accessories ∅ weight: 630 g
