

A solid, high-quality aluminum case designed for the Sky-Watcher EQ3 / EQ3-2 assembly head. Inside the box there is a properly embossed sponge to secure the assembly during transport. All the edges of the box are reinforced with steel finishes. Comfortable handle and snap locking system together with a set of two keys is a guarantee of safe assembly transport. Very aesthetic, textured aluminum, which is finished the outer surface of the suitcase, has the manufacturer's logo. Feet and additional bumpers placed on the bottom and bottom of the suit protect its surfaces from dirt and scratches from the ground. The suitcase is ideal for transporting by car, by plane or simply to conveniently move the assembly from the house to the observation post. Metal construction is a guarantee of long-term, trouble-free operation.
