

teleskopy.pl

The new Delta Optical Titanium spotting scope was designed for those who do not accept compromises. High transmission of light, for a single layer of 98% and for the entire telescope, 92% put them among the best. A centrally illuminated red dot will help you track down the target even in the conditions of a special lighting. Another characteristic feature of the Delta Optical Titanium spotting scope is high mechanical resistance. Built from a tube with a diameter of 30 mm, they can withstand shots even on weapons with a strong 9.3x62 caliber! Thanks to nitrogen filling, they are also water and fogproof. Confirmation of uncompromising quality is a 10-year warranty. So we give you confidence that the telescope will not let you down. Riflescope for weapons with kinetic energy up to 5,200 J. Technical parameters

- magnification: 8x
- Lens diameter: 56 mm
- coatings on lenses: multiple (Fully Multi Coated)
- Reticle: German 4A
- cross adjustment (1 click): 1/4 MOA
- Center point diameter @ 100 m: 14.2 mm @ 8x
- target netting highlighting: yes, the central point
- Blow diameter: 6.8 mm
- distance from the eye: 82 mm
- field of view at 100 m: 5 m
- minimum sharpening distance: 31 m
- angled field of view: 2.87 °
- 90% light transmission (620 nm wavelength)
- Twilight efficiency: 21.17
- water resistance: 0.3 kg / cm²
- filling gas: nitrogen
- tube: two-piece 30 mm
- weight: 620 g
- length: 348 mm
- resistance to dust, shock: 800 G / 5200 J
- body material: aluminum: 70%, brass: 20%, steel: 10%
- functional temperature range: -20 ° C to + 70 ° C
- Warranty: 10 years
