

In our opinion the best tripod GoPro adapter on the market! Works with all versions of GoPro HD HERO The tripod adapter allows you to use your GoPro camera where it was not possible before! Thanks to it you can mount the GoPro camera on any tripod equipped with a standard 1/4 "thread. THE ADAPTER IS MADE FULL OF METAL - you do not have to worry that something will break. Recommended for the most extreme games, when the certainty of fixing must be uncompromising. It also has a self-locking element for screwing the screw into the GoPro camera. Technical parameters ∅ thread: 1/4 inch, photographic standard ∅ Base diameter: 34.5 mm ∅ height: 23.4 mm ∅ weight: 20 g
