Amateur astronomy is a new magazine written by Miłoszniki Astronomy for Milans of Astronomy. Sturdy articles, tests, observational advice and astronomical updates, which are in vain to find on few astronomical forums. In the current issue (August 2013) Permanent departments

- Astronomy from the world of astronomy (K. Kanawka et al.)
- What in the sky? Interesting configurations of the Moon, planets and stars (M. Siudziński)
- Interesting nebular objects (P. Guzik)
- Constellations of the month (J. Desselberger)
- News from the world of comets (P. Guzik)
- Report on the Sun activity (Society of Sun Observers)
- Polaris-OPP activity schedule for the current month
- We observe meteors (K. Kida)
- Reader's gallery articles
- Ah, those August nights (J. Kolwas)
- Carina's Kingdom (D. Jasińska)
- Almost like a disco (J. Desselberger)
- Astrophotography Vixenem Polarie (A. Skoczewski)
- Astronomy on the balcony (P. Maliński)
- Delta Optical StarLight 12x60 binoculars (M. Siudziński)
- Observation planning (M. Siudziński)
- Nationwide Seminar of Astronomy Students
- Nicolaus Copernicus' Instrumentarium (M. Kosiński)
- Delta Optical AstroShow 2013
- Two for the price of one - Interesting surroundings of Messier's facilities (P. Harrington)

In the sky (P. Brych, K. Kida): Precise ephemerid maps of 23 comets, asteroids and planets Evening and morning sky Heaven in the current month Saturn's moons Uranus Moons Triton - Neptune's moon Ephemerides of several dozen variable stars The month's star (SS Cyg) Astronomical calendar, and in it: planets Phases, perigea and apogee of the Moon Sunrise and sunsets of the Moon Sunrise and sunset Moon conjunctions with planets Moon conjunctions with stars and clusters Maksima, the meteor shower Oppositions of bright asteroids The covering of stars by the moon Additional information
