POWERBEE FA58 is an innovative product that allows the use of photographic filters and other photographic accessories with a diameter of 58 mm in the GoPro HERO3 camera. Thanks to it, it becomes possible to obtain effects not available so far for sports cameras. The filter adapter allows the use of all types of filters, e.g. UV, polarizing, color, stars, gray, and half. It also allows the use of Cokin accessories and filters. The adapter is made of lightweight and durable aluminum alloy, it is equipped with two holes for mounting the strings. The adapter is mounted by pushing it onto the plastic lens frame. Installation is fast and reliable, allowing you to use in difficult conditions. Note: it does not work with GoPro Hero3 + or Hero4. Specification ∅ material: aluminum alloy ∅ Filter diameter: 58 mm ∅ included: POWERBEE FA58 adapter (58 mm), fixing bow
