Sky-Watcher 80/600 APO ED OTA PRO is a perfectly designed apochromatic optical tube. One of the elements of the lens system is made of high-class low-dispersion ED ED (FPL-53). The novelty is the use of German glass company Schott AG, leading in the field of glass for optics as the chronicle of glass (the owner of Schott is 100% Carl Zeiss AG - a company known for the highest quality visible in optics design, what materials are used). All in all, we get the optics of one of the highest in the world, for a price that is a fraction of the price we have to pay for the tubes of Japanese brands with analogous parameters. Each glass-air surface was covered with layers of MHC (called "Metallic High-Transmission Coating"), ensuring efficiency on a single border of 99.5%. The offered set is a "naked" tube, a clean astrograph without visual observation accessories, which the tube can always be retrofitted with. Technical data ∅ optical system: APO ED ∅ Lens diameter: 80 mm ∅ optical advances: Japanese FPL-53 (ED), cron - Schott AG ∅ focal length: 600 mm ∅ weight: 2.47 kg ∅ accessories: 2 "/ 1.25" spectacle extractor, adapter with T2 thread, clamps, dovetail ∅ dimensions of the optical tube: 100x620 mm Warranty 3 years (below: an example set, on the EQ6 installation of SkySaver's Syntre, with a finder, an eyepiece and an eyepiece)
