

The aluminum arm with the base makes it extremely easy to attach the GoPro camera to the helmet. Made of durable aluminum, it provides much more durability than plastic fasteners. It allows you to attach to the surface with screws, which makes the camera more secure than any other mount available on the market. Perfect in extreme situations. The arm allows you to film the face, and the swivel base allows you to set the camera in any direction. Replacement manufactured by Redleaf. From the set:  $\hat{\text{€}}$  rotatable support  $\hat{\text{€}}$  shoulder 20 cm long  $\hat{\text{€}}$  two mounting screws  $\hat{\text{€}}$  aluminum GoPro screw  $\hat{\text{€}}$  two nuts for screws Additional product photos
