Camrock TA30 is a universal tripod designed for people actively photographing. Requiring uncompromising dimensions and low weight. Weighing only about 500g Camrock TA30 complete with a dedicated carrying case is a product that can be taken anywhere. The legs of the tripod consist of three telescopic sections, which freely allows you to choose a height and give the structure stability. The head is equipped with a spirit level, the contact surface with the camera is covered with rubber to prevent the mounted equipment from slipping. The Camrock TA30 tripod is ideal as the base for an external flash. Thanks to the small spacing of legs (74 cm), it can easily fit even in a small room. Technical parameters
