

teleskopy.pl

Nautic 8x25 is a handy monocular observation and navigational device dedicated for use on swimming vehicles and in the case of bad weather. The telescope has a nitrogen filling for water resistance and counteracts the internal fogging of optical surfaces. The housing is made of profiled rubber for one-handed grip. The Nautic 8x25 mono optical eyepiece system provides sharp contrast images, and all lenses are made of high quality BaK-4 glass and covered with multilayer FMC optical coatings for high optical performance. With the observation eyepiece I used the retractable eyepiece, which allows users to wear glasses for comfortable observation. The set includes a cover and bow. Technical parameters

- Zoom: 8x
- Lens diameter: 25 mm
- Output: 3.1 mm
- Retracting the output pupil: 15 mm
- Prism: roof, BaK4
- Field of view: 122 m / 1000 m
- Layers: FMC
- Minimum distance of observation: 4 meters
- Water resistance: Yes
- Nitrogen filling: Yes
- Dimensions: 38 x 55 x 110 mm
- Weight: 155 g
