

teleskopy.pl

The heating band for the astronomical telescope allows delicate heating of the optical elements (eg lens lenses) and in this way, remove the misting and prevent the condensation of water vapor on the optics. It has an integrated controller (3 positions: LO - OFF - HI). \varnothing length of the heating band: 60 cm \varnothing total length with fixing: 72 cm \varnothing length of the power cord: over 155 cm \varnothing width of the band: 5 cm \varnothing power supply: 12 V direct voltage, power consumption depending on the length of the band, can reach HI to 1 A \varnothing A power outlet that matches the round 2.1 / 5.5 mm power plug \varnothing suggested
