

teleskopy.pl

Tripod with a unique design, allowing stable support and camera positioning in almost any conditions. Now you can set your GoPro camera wherever it was impossible until now - on the rocks, on the branch, pole, fence mesh, chair back and many more. Unlike traditional tripods, the tripod does not require an even surface. Thanks to the flexible and flexible legs, the tripod can be adapted to any surface. The design of the feet allows you to "capture" the elements of the environment and set the camera in any position. The tripod is handy, does not take up much space, fits into your pocket. Technical parameters - mountings: 1/4 inch (photo) - to mount the GoPro camera you need a tripod adapter (tripod adapter) - dimensions: 165 x 35 x 35 mm - weight: 45 g (note: to mount the GoPro camera you need a tripod adapter or photographic adapter, which prices start at PLN 10)
