The TACORO A-SJ photo backpack combines the convenience of access to equipment known from photo bags with the comfort and capacity of a backpack. It is characterized by high quality of workmanship, large capacity and

exceptional functionality. Stiffening the structure and lining all internal surfaces with soft and delicate fabric guarantees full equipment safety. The backpack has a capacious main compartment, a front pocket, a laptop pocket and side pockets. The main compartment will contain a SLR camera with a lens (also with a telephoto lens), an additional 2-3 lenses, a flash lamp, a spare body. The front pocket is ideal for storing accessories such as filters, reductions or spare batteries. Side pockets can be used to carry personal items, phone, wallet, bottle with drink, etc. The main compartment can be adapted to the needs with the use of velcro compartments. The laptop pocket is located behind the main compartment, a computer or tablet up to 13 "in diameter. The back of the backpack is covered with a sponge and covered with a breathable fabric, which increases comfort during longer trips. The backpack is equipped with comfortable, adjustable length braces with a belt at the height of the breasts and a handle in the upper part. The set includes a strap with which we can attach a tripod to the front of the backpack. The backpack also has a convenient carrying handle. Zip fasteners are protected against moisture. External dimensions (height x width x depth): 46 x 30 x 20 cm Internal dimensions of the main compartment (height x width x depth): 40 x 26 x 12 cm Materials from which the backpack was made guarantee its extraordinary durability. These are: Polyester 1000S, polyester Ripstop, 2000D TXP nylon, PE foam.
