Celestron 12x70 Cometron is a very bright and powerful binoculars. The combination of 70-mm lenses with 12x magnification guarantees excellent image brightness, with resolution, detail perception and good stability. The binoculars are great for astronomy as well as for nature observation and observation of aircraft. Gorgeous binoculars for viewing the whole sky, learning constellations, observing nebulae, variable stars and searching for comets. Good for observation "from the hand", with the possibility of connecting to any photo tripod - a tripod adapter included. Comes with a neck strap, lenses and glasses covers, a belt case and a tripod adapter (1/4" - standard tripod thread). Technical parameters

- Lens diameter: 70 mm
- Zoom: 12x
- Exit pupil: 5.8 mm
