Bresser Nautic 7x50 with a compass is a waterproof binoculars for use on water, in rain, in high humidity conditions. It is a robust optical device, well supporting sailors, canoeists, motorboats in the field of navigation, reading the signs of the locia, as well as for field and nature observations. The binoculars were sealed with O-rings and filled with nitrogen, thanks to which it does not evaporate in the middle, and immersion in water or rain are not dangerous for it. The binoculars are characterized by good optical properties, give nice, contrasting images, and at the same time ensure high ergonomics of use. Built-in compass and rangefinder pitch are additional useful features of this device. In total, this product is an invaluable help during inland and sea navigation. Technical parameters
