

Braces are the most convenient way to wear binoculars for many hours. Braces are ideal for transporting binoculars, rangefinders, cameras or cameras. The device worn on the bib is kept close to the chest, thanks to which our optical equipment is not exposed to bruising. Basic features: 

- adjustable, elastic straps, careful workmanship
- easy putting on and removing the harness
- keeps the binoculars in a comfortable position for quick access
- eliminates neck strain when handling particularly heavy binoculars, cameras, etc.
