

Frame 2.0 - new, better frame for GoPro HERO4, 3+, 3. It is an open housing for cameras from Hero3 and above. It is the smallest and lightest option for attaching the camera. The open design ensures the best sound recording quality for low-speed movements. Characteristics

- compact, compact and light construction with low profile
- equipped with a glass cover that protects the camera lens from scratches, dirt and dust
- provides very good sound recording at low and medium movement speeds
- the frame allows access to all camera ports, including loading and ripping
- removing the camera from the frame is very fast
- compatibility with LCD Touch BacPac and Battery BacPac version for Hero 3 / 3+ / 4

NOTE: The Frame Mount casing is NOT waterproof and does not provide protection for the camera under extreme conditions of use. It does not provide the highest protection for the camera and its optics for dirt and impact. The product is compatible only with Hero 3 / 3+ / 4 cameras. Warranty 2 years
