

teleskopy.pl

The National Geographic 20-60x60 riflescope with a bag and a tripod stand is a universal tool for far-sighted field and natural observation. Magnification smoothly variable from 20 to 60 times, lens diameter 60 mm. It guarantees very good mapping quality and solid mechanical construction. The telescope has a retractable diffuser / sunshield, an integrated cover with a snap and the possibility of rotation in the bracket (especially useful on the shooting range). Technical parameters

- Zoom: smoothly variable, 20-60 times
- Lens diameter: 60 mm
- Optical system: achromatic lens + 45° prism
- Optical glass: BK-7
- Anti-reflective layers: blue, Fully-Coated
- Field of view (angular): 1.7° @ 20x
- Field of view (at 1000m): 29 m @ 20x
- Retracting the output pupil: 13 mm @ 20x
- Minimum distance of observation: 12 m
- Dimensions: 350 x 155 x 95 [mm]
- Ringer outer diameter: 79.8 mm
- Height of table tripod: 24 cm
- Spacing of the legs of a tripod: 30 cm
- Weight: 995 g (1330 g with cover and tripod, tripod: 245 g)

Additional information: The set includes:

- telescope
- case
- table stand
