BacPac Backdoor KIT - a set of three spare doors for the GoPro cassette: standard waterproof door, Skeleton door (semi-open, openwork), door for the Touch PacPac screen. Note: the door needs the establishment of BacPac LCD or Battery BacPac - or the camera "years" in the housing. • standard door provides waterproofing up to a depth of 60 meters with Hero 3 enclosures (they do not fit 40 m frames) • Skeleton door (openwork) with open sides for port access, improved cooling and best sound quality for low-speed activities • touch door allows you to fully use the LCD Touch BacPac display and guarantee water resistance up to 3 meters • the door is pushed into the cassette - the installation does not require any tools
