

teleskopy.pl

Delta Optical Titanium telescope 1.5-9x45. Very good for shooting on the run. Magnification 1.5x enables binocular aiming, for collective hunting, giving an unlimited overview of the field. Due to the large lens diameter and brightness and 9x magnification it can also be used successfully for stalking and for sitting and distant shots even during twilight. Designed for mounting on combination weapons or ball machines, it has all the features of a universal telescope. Reticle: 4 A with an illuminated dot. Technical parameters ∅ magnification: 1.5 - 9 x ∅ Lens diameter: 45 mm ∅ coatings on lenses: multiple (Fully Multi Coated) ∅ Reticle: German 4A ∅ field of view (°): 13.9-2.33 ∅ field of view (m @ 100 m): 24.4-4.07 ∅ exit pupil (mm): 10.9-4.9 ∅ distance from the eye, mm: 79-85 82-95 ∅ Dioptre adjustment (D): +/- 2D ∅ 1 click (MOA): 0.25 ∅ cross adjustment range (MOA): 30 ∅ operating temperature range (° C): from -20 to +71 ∅ water resistance / fog resistance: 0.3 psi ∅ length: 360 mm ∅ weight: 660 g ∅ tube: 30 mm ∅ highlighted point: yes Warranty 10 years
