

Classic Series riflescopes for recreational shooting are the precision and reliability you need. High-quality optics and multilayer anti-reflective coatings provide a sharp and clear image. High shock resistance and a solid one-piece tube guarantee accurate shots and many years of use. The nitrogen filling provides water and mist resistance. The grid is graduated for 9x magnification. Technical parameters ∅ magnification: 3-9x ∅ field of view at 100 m: 14 m (3x) - 5 m (9x) ∅ Excavation: 13.3 mm (3x) - 4.4 mm (9x) ∅ minimum sharpening distance: 15 m (3x) - 32 m (9x) ∅ distance from the eye: 86 mm ∅ tube: 1 "(25.4), black matt ∅ 1 click: 1/4 MOA ∅ weight: 416 g ∅ Reticle: MilDot ∅ the telescope can be mounted on: weapon with kinetic energy no greater than 3500 J air rifles with kinetic energy no more than 17 J Warranty 3 years
