

teleskopy.pl

The Yukon Scout 30x50 spotting scope is a high quality extendable monocular. A large, 30-fold magnification guarantees a great visibility of details, a lens with a diameter of 50 mm ensures good brightness of the obtained images, and the rubberized casing makes the telescope very mechanically resistant and fits well in hand. The lenses of the telescope are covered with MC layers of magnesium fluoride to ensure a high light transmission coefficient. ALL-GLASS OPTICS A telescope equipped with a socket for attaching it to any photographic tripod (1/4 inch thread) RESISTANT TO RAIN AND MOISTURE Technical parameters " Magnification: fixed, 30x " Objective diameter: 50 mm " Optical system: achromatic lens + roof prisms, glass optics " Anti-reflective layers: MC (magnesium fluoride) " Field of view: 31 m / 1000 m " Minimum observation distance: 15 m " Dimensions (unfolded): 370 x 70 x 70 [mm] (folded 230mm) " Weight: 450 g Usage landscapes birds planes digiscoping shooting Additional information: Weather-resistant, rubberized, durable housing. Equipped with a tripod socket. Comes with a carrying case. Warranty 2 years warranty
