Fotopro

The Fotopro FL series of tripods is a professional tool with exceptional properties and performance. Developed for photographers waiting for certainty and reliability in all conditions. The FOP-584 Fotopro tripod, made of aluminum and magnesium alloys, is an extremely well-developed tool for both an amateur and a professional. A number of solutions give you the opportunity to date only available for the most expensive products. The central column can be mounted in reverse (upside down), making it easier to photographing small objects. The tripod has a three-leg inclination system. Leg locks are metal and plastic clamps, thanks to which we can prepare for work or put a tripod quickly. The tripod has a detachable leg that can be used as a monopod 134 cm high when unfolded. The standard 3/8 "thread allows the attachment of any photographic head, including the Fotopro FPH-61G ball head. Thanks to its technology, the forging has an ordered structure which guarantees high strength, even at extreme temperatures. has been set in a set of contours and a certain lock of the quick coupling, preventing accidental release. The set includes a sensational cover and a sachet improving the quality and comfort of working with monopod. It is perfectly suited for use with SLR cameras, heavier medium-format cameras and cameras. Warranty 2 years
